Mr. Richard H. Gilbert, Jr., CPA
Deputy State Auditor
State of South Carolina
Columbia, South Carolina

We have performed the procedures described below, which were agreed to by the South Carolina Office of State Auditor and management of South Carolina Department of Commerce (the "Department"), solely to assist you in evaluating the performance of the Department for the fiscal year ended June 30, 2013, in the areas addressed. The Department's management is responsible for its financial records, internal controls and compliance with State laws and regulations. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the specified parties in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures and the associated findings are as follows:

1. Cash Receipts and Revenues

- We inspected selected recorded receipts to determine if these receipts were properly described and classified in the accounting records in accordance with the Department's policies and procedures and State regulations.
- We inspected selected recorded receipts to determine if these receipts were recorded in the proper fiscal year.
- We made inquiries and performed substantive procedures to determine if revenue collection and retention or remittance were supported by law.
- We compared current year recorded revenues at the subfund and account level from sources other than State General Fund appropriations to those of the prior year. We investigated changes in the earmarked, restricted and federal funds to ensure that revenue was classified properly in the Department's accounting records. The scope was based on agreed upon materiality levels \$210,000 – earmarked fund, \$160,000 – restricted fund, and \$160,000 – federal fund and ± 10 percent.

The individual transactions selected were chosen randomly. We found no exceptions as a result of the procedures.

2. **Non-Payroll Disbursements and Expenditures**

- We inspected selected recorded non-payroll disbursements to determine if these disbursements were properly described and classified in the accounting records in accordance with the Department's policies and procedures and State regulations, were bona fide disbursements of the Department, and were paid in conformity with State laws and regulations; if the acquired goods and/or services were procured in accordance with applicable laws and regulations.
- We inspected selected recorded non-payroll disbursements to determine if these disbursements were recorded in the proper fiscal year.
- We compared current year expenditures at the subfund and account level to those of the prior year. We investigated changes in the general, earmarked, restricted and federal funds to ensure that expenditures were classified properly in the Department's accounting records. The scope was based on agreed upon materiality levels \$240,000 – general fund, \$300,000 – earmarked fund, \$300,000 – restricted fund, and \$170,000 – federal fund and ± 10 percent.

The individual transactions selected were chosen randomly. We found no exceptions as a result of the procedures.

3. **Payroll Disbursements and Expenditures**

- We inspected selected recorded payroll disbursements to determine if the selected payroll transactions were properly described, classified, and distributed in the accounting records; persons on the payroll were bona fide employees; payroll transactions were properly authorized and were in accordance with existing legal requirements and processed in accordance with the Department's policies and procedures and State regulations.
- We inspected payroll transactions for selected new employees and those who terminated employment to determine if the employees were added and/or removed from the payroll in accordance with the Department's policies and procedures, that the employee's first and/or last pay check was properly calculated and that the employee's leave payout was properly calculated in accordance with applicable State law.
- We compared current year payroll expenditures at the subfund and account level to those of the prior year. - We compared the percentage change in recorded personal service expenditures to the percentage change in employer contributions; and computed the percentage distribution of recorded fringe benefit expenditures by fund source and compared the computed distribution to the actual distribution of recorded payroll expenditures by fund source. We investigated changes of ± 10 percent to ensure that payroll expenditures were classified properly in the Department's accounting records.

The individual transactions selected were chosen randomly. We found no exceptions as a result of the procedures.
